Betty J. Haitz
414 N. Manoa Rd.
Havertown, PA 19083

Dear Ms. Haitz:

Thanks for expressing your opinion on the proposed plan for the Havertown PCP site. EPA is planning to conduct additional testing east of Naylor's Run and we'll be developing a sampling plan which we feel will better define the possible contamination. To do this, we will select the locations which we believe will be the most representative. We will consider your area for testing.

Additionally, EPA has posted signs in Bailey's Park to advise parents and children that playing in Naylor's Run is undesirable. I should point out that EPA's efforts to date at Havertown have been successful but additional work will be needed in the next few years to make the area safer and to restore it to its original condition.

If you have any future questions, please contact me.

Sincerely,

A handwritten signature in cursive script, reading "Jerome M. Curtin", is written over the typed name.
